Summary of the 14th SYMAS[®] and MAINTENANCE International Trade Fair

Behind us is an incredibly successful 14th edition of the International Trade Fair for Powder & Bulk Solids Technologies SYMAS[®] and International Trade Fair for Suppliers of Maintenance Products and Services MAINTENANCE, which took place on October 18 and 19, 2023 at EXPO Krakow. The event was attended by 137 exhibitors and 3291 visitors. Exhibitors do not hide their satisfaction with the quality of the held meetings and have already booked booths for next year during the current edition.

The SYMAS[®] and MAINTENANCE trade fair is the only event in Poland that presents solutions for bulk and solids and for maintenance, which is appreciated by many visitors.

- I believe that here the range of visitors is quite wide - from end customers who are looking for solutions for themselves, to manufacturers who are looking for new solutions on how to improve their machines. Construction offices or designers who want to learn about the latest trends also show up - noted Przemyslaw Chrobak, Managing Director at Abraservice Poland.

- We know that everyone is busy on a daily basis - problems with failures, problems with production downtime. Then there is no time to work out some solutions, but here we can meet. We can talk and think about what we can do together to make our customers' work better and these downtimes as short as possible - said Marcin Lenart, Sales Manager at RGB Elektronika.

EXPERT WORKSHOPS

During the workshops on the trade fair stage, experts presented many interesting issues related to not only the repair of selected equipment, but also the optimization of costs and production processes in building design or employee competencies in the era of Industry 4.0.

AUTUMN MAINTENANCE SCHOOL

The Autumn Maintenance School conference, during which specialists in energy efficiency, industrial cyber security, reliability and efficiency of maintenance departments shared their experiences with their professional colleagues received great recognition. Participants learned about case studies from plants such as LG Electronics, BorgWarner, 3M, Woodward, Kuźnia Jawor and Knauf. The audience appreciated the conference's topics, which provided an understanding of the upcoming changes and will make it easier to prepare for new challenges in the future.

MOUNTAINEERING RESCUE DEMONSTRATIONS

Masters of Altitude, a company specializing in mountaineering services for industry, made its trade fair debut at SYMAS® and MAINTENANCE. The company took full advantage of the potential of the trade fair – in addition to active talks at the booth, experienced mountaineers several times a day presented services in the ceiling area, including mountaineering rescue, as well as first aid.
